RAFAEL OERTEL

Production Engineer | Project Planning & Management · Process Improvement | Operational Governance across Four Industries
Niterói, Brazil +55 21 99880-1091 rafael.oertel@gmail.com linkedin.com/in/rafael-oertel-16750b40 rafaeloertel.com

PROFILE

Production Engineer with 13 years in project planning and management, process improvement and operational governance across four sectors: offshore oil & gas, logistics, passenger transport and corporate consulting. Eight years in offshore oil & gas (Equinor via Accenture, and SBM Offshore), five of them on 14x14 offshore rotation, built the foundation in regulated settings: KPIs, cost control, supply chain and SAP-based compliance. Since 2025, I have run the digital transformation of a transport company as an end-to-end project, with an ERP built from zero on Microsoft 365. Open to senior roles in project management, process improvement and operational governance, within and beyond oil and gas.

SELECTED RESULTS

- Led an ERP project end to end on the existing Microsoft 365: 35+ modules across 8 areas, from v0.1 to v0.14 in 7 weeks, with testing and review on every release and no additional software cost.
- Moved a 60-employee transport operation from paper and legacy Excel to Microsoft 365 in 8 months, with 12 SharePoint sites tied to Entra ID and permissions set per module.
- Built a 76-item OHS compliance framework from zero across 7 regulatory standards (NR-1/6/10/17/20/24/26), prioritized by risk severity and legal deadline.
- Promoted from Analyst to Offshore Logistics Operations Coordinator on the Equinor account within 15 months, then coordinated offshore supply operations for 5 years with a focus on cost control and OTIF.

CORE COMPETENCIES

- Project Planning & Management
- Cost Control & Budgeting
- KPIs & Executive Reporting
- Process Improvement
- Governance & Compliance
- Offshore Logistics & Supply Chain
- Digital Transformation (M365, ERP)
- Workflow Automation & AI
- Supplier Management

PROFESSIONAL EXPERIENCE

Sep 2025 – Present
1 YR · 3 MOS

NOVA MACABU
Operations & Compliance Lead
Regional passenger transport company (13 buses, 60 employees) · Macaé, RJ · Self-Employed · Hybrid
Running the digital transformation as an end-to-end project: discovery, scope by modules, a versioned roadmap and rollout without stopping operations, on an in-house ERP built on Microsoft 365.

Feb 2024 – Aug 2025
1 YR · 7 MOS

SBM OFFSHORE
Project Management Specialist
FPSO operations, Brazil · Rio de Janeiro · Full-Time · Hybrid
Project controls and performance analysis for offshore assets: maintenance KPI governance, asset performance analytics and coordination between engineering, maintenance and procurement teams.

Nov 2017 – Jan 2024
6 YRS · 3 MOS

ACCENTURE · ON BEHALF OF EQUINOR
Marine Analyst › Offshore Logistics Operations Coordinator
Equinor Brazil offshore supply chain · Rio de Janeiro · Full-Time · 14x14 offshore rotation 2019–2024
Progressed from Analyst to Coordinator within the same account, with growing responsibility for offshore supply chain continuity, vessel and cargo planning, logistics cost control and supplier governance.

Oct 2012 – Oct 2016
4 YRS · 1 MO

AFFEROLAB
Project Management Analyst
Corporate education & consulting · Rio de Janeiro · Full-Time · On-site
Project cost control, KPIs and reporting for business units in strategy execution, governance and learning solutions, including the VALE account, the company's largest client.

EDUCATION

Post-Graduate in Petroleum Engineering (Drilling Operations)
Universidade Federal do Rio de Janeiro (UFRJ) · 2015 – 2016

B.Eng., Production Engineering
Universidade Gama Filho · 2008 – 2014

CERTIFICATIONS

CBSP Offshore Basic Safety Training · valid to Jun 2029
HUET Helicopter Underwater Escape · valid to May 2028

TOOLS & SYSTEMS

ERP & Analytics: SAP, Power BI, Excel (advanced)
Microsoft 365: SharePoint, Entra ID, Power Automate
Automation & dev: Make, Twilio, GitHub, JavaScript
AI: AI-assisted development and analysis

KEY ACHIEVEMENTS & DELIVERABLES

Nova Macabu · Operations & Compliance Lead
Sep 2025 – Present

- **ERP project management:** discovery with each area, scope by modules, a versioned roadmap (v0.1 to v0.14 in 7 weeks), automated tests and independent review on every release, and rollout without stopping operations.
- **Architecture & infrastructure:** deployed the company's Microsoft 365 and built the ERP on top of it (SharePoint, Entra ID, Microsoft Graph): 35+ modules across 8 areas, 12 SharePoint sites with role-based access and per-module permissions, no additional software cost.
- **Finance & board:** gave the board its first monthly executive report, with cash-flow forecast, P&L and indicators, CAPEX/OPEX and investment plan; consolidated 9 debt portfolios into one view and put Accounts Payable under approvals and due-date alerts.
- **Operations & people:** retired 4 legacy apps and paper controls (fleet and maintenance, diesel, crew scheduling, time and attendance, talent pool, task center) into a single system with one sign-in, with zero records lost in migration.
- **Compliance & customer service:** built the 76-item OHS framework across 7 standards, prioritized by risk and legal deadline; unified 3 customer-service channels (WhatsApp, web and email) into one ticket base with AI classification and unique protocol numbers; drivers now receive fleet infraction alerts via WhatsApp.

SBM Offshore · Project Management Specialist
Feb 2024 – Aug 2025

- **Asset performance analytics:** built and maintained the uptime, reliability and maintenance KPIs that engineering and operations leadership used to prioritize backlog and plan interventions.
- **Maintenance governance:** structured preventive and corrective maintenance tracking through KPI governance, improving backlog prioritization and asset availability.
- **Cross-functional coordination:** aligned engineering, maintenance and procurement stakeholders to keep critical work orders and materials within operational windows, ensuring continuity of production.
- **Project control documentation:** standardized templates and reporting, improving data integrity and the reliability of executive reports.

Accenture · Equinor · Offshore Logistics Operations Coordinator
Feb 2019 – Jan 2024

- **Logistics governance:** led integrated governance covering planning, material management and performance monitoring across supply operations, reporting to Equinor's logistics and operations management.
- **Supply chain continuity:** managed end-to-end material flow aligned with production and drilling schedules, keeping critical equipment and consumables on time to offshore units.
- **Cost optimization:** reduced logistics costs by optimizing vessel scheduling and restructuring material flow processes, improving OTIF consistency and cost transparency.
- **Compliance & risk:** strengthened SAP-based compliance controls and structured monitoring routines, raising operational control maturity across the offshore supply chain.
- **Supplier governance:** improved supplier performance management and cross-functional alignment between operations, procurement and offshore installations.
- **Offshore operations (14x14 rotation, Feb 2019 – Jan 2024):** four years on fixed platforms, primarily coordinating logistics for drilling operations, and one year supporting FPSO maintenance campaigns from a flotel; supervised deck and cargo operations and dangerous goods compliance (IMDG) on board.

Accenture · Equinor · Marine Analyst
Nov 2017 – Jan 2019

- **Vessel & cargo planning:** planned supply vessel schedules and cargo manifests (deck cargo, bulk, dangerous goods) between the onshore base and offshore units, aligned with production and drilling demands.
- **Performance reporting & SAP:** built logistics KPI reports (vessel utilization, OTIF, cargo backlog) in Excel and Power BI; processed material and cargo transactions in SAP for tracking and invoicing.

Afferolab · Project Management Analyst
Oct 2012 – Oct 2016

- **KPI management:** developed and monitored KPIs for financial performance, productivity and outsourced services across a portfolio of client projects, including the VALE account (over 40% of the project portfolio).
- **Budget control & reporting:** managed project budgets and reimbursable expenses as the financial interface between Sales, Logistics and Procurement; replaced manual spreadsheets with consolidated monthly reporting and KPI dashboards for leadership.
- **Cost analysis:** owned the financial analysis frameworks behind recurring monthly cost-reduction initiatives, including a 2% reduction in reimbursable expenses.
